

Figure 1 is a plot showing the age distribution of the 1000 oldest radiocarbon dates from the 1000 Lakes Project. The x-axis represents Age (cal years BP) from 2400 to 0, and the y-axis represents the Number of dates from 0 to 1000. The distribution is shown as a blue shaded area, with a black line indicating the median date. A vertical line at 81171 BP marks the median date. An inset plot shows a zoomed-in view of the distribution between 1000 and 600 BP, with a label '81169' indicating a specific date.
