

The graph displays the age of the oldest wood in a ditch over time. The x-axis represents 'Age (cal years BP)' from 5500 to 500. The y-axis is unlabeled. A blue shaded area represents the range of ages, and a black line represents the estimated age. The age increases from about 5500 BP to 500 BP, then drops sharply to near 0 BP around 200 BP. Two points are labeled: 34925 and 34926.
